2014 DODGE CHARGER

When did we become okay with compromise? Being flexible about dinner is one thing. Willingly getting behind the wheel of a zero-personality box on wheels is another. No one hoped for basic transportation on their 16th birthday. We wanted fast. We wanted sporty. We wanted to be envied. And if we could get it in Red, all the better. It's time to want again. It's time to demand. It's time to get behind the wheel of Dodge Charger. Designed with passion. With up to 370 horsepower from the available legendary HEMI® V8 engine and up to 31 mpg* highway and 300 horsepower from the Pentastar® V6 engine. Built with technology. And with the power to move you in more ways than one. And while we're not playing favorites, we do think it looks especially bold in one of our throwback colors.

A note about this brochure: all disclaimers and disclosures can be found on page 19.

* EPA estimated 19 mpg city/31 mpg highway. Actual milage may vary.

CHARGER: MUSCLE

Charger R/T Road & Track shown in Header Orange.

It's been forged with the aptitude to simultaneously look back while powering forward. The dual scalloped hood, the tapered bodyside profile, tight wheel openings, dual trapezoidal chrome exhaust tips and a signature 164 LED racetrack taillamp pay homage to its muscle-car roots. And where nostalgia leaves off, dynamic 21st-century engineering begins. The sculpted silhouette sharpens its aerodynamic performance. The low and aggressive front end offers no apologies for the menacing grille it wears as a badge of pure American muscle. A laser-brazed roof eliminates roof ditch moldings for a purely premium appearance. Tap into the tuner vibe with an available Black painted roof and with polished and forged Black Chrome or Gloss Black 20-inch wheels. Standard automatic quad halogen reflector headlamps with Gloss Black bezels or available low-beam High Intensity Discharge (HID) headlamps project light and attitude with equal authority. And while horsepower will always remain king, its powerplant has been machined to efficiently sip fuel rather than gulp it.

Charger R/T Road & Track shown in Granite Crystal Metallic with available Black roof and 20-inch polished forged aluminum Classic II wheels.

25 MPG‡ HWY

470 HP

470 LB-FT OF TORQUE

6.4L SRT® HEMI VVT V8 WITH FUEL SAVER TECHNOLOGY

The award-winning 3.6-liter Pentastar V6 starts strong with an impressive 292 horsepower and kicks the ponies up to 300 when paired with the available packages* that include Sport Mode, cold air induction, sport-tuned exhaust and die-cast paddle shifters. Couple that with an available eight-speed transmission for an impressive combination of 0-60 mph in 6.6 seconds[1] and 31 mpg† highway.

EIGHT-SPEED TRANSMISSION WITH E-SHIFT. The available E-shift eradicates traditional shift linkages, which helps the engine operate in its optimum range, resulting in smoother, faster, more efficient performance and an improvement in standard fuel efficiency. There's also an 11 percent emissions reduction, nearly imperceptible gear changes, impressive acceleration and transmission efficiency, especially in cold environments or at vehicle start-up. Two shift programs are featured: a standard pattern for everyday driving and a Sport Mode for a more aggressive feel and extended shift points. Sport Mode can also be used with the available die-cast steering wheel-mounted paddle shifters.

The legendary 5.7-liter HEMI V8 not only releases 370 horsepower, 395 lb-ft of torque and 0-60 mph acceleration in the low five-second range,[1] but it also uses Fuel Saver Technology to give it impressive fuel efficiency. When eight cylinders are not needed, the system deactivates four to create the ideal combination of power and efficiency. When more power is needed, the system seamlessly restores power to all cylinders. It's technology like this that makes Charger both ego-friendly and eco-friendly.

* When equipped with the available Blacktop Package, Rallye Appearance Group or Redline Package with 8-speed automatic.† EPA estimated 19 mpg city/31 mpg highway. Actual mileage may vary.
‡ EPA estimated 16 mpg city/25 mpg highway. Actual mileage may vary.

MISSION: CONTROL

Power without control is meaningless. That's why Charger's front and five-link independent rear suspension components were specifically engineered to deliver excellent body and wheel control, optimized road surface contact and engaging handling prowess.

Every model comes outfitted with standard control offerings like ABS, Hill Start Assist, Ready Alert Braking (RAB), All-Speed Traction Control, Rain Brake Support and four-wheel disc brakes that bring substantial braking power with antilock and Brake Assist.

The standard Electronic Stability Control (ESC)[2] uses sensors to provide instant aid when it detects that you're veering off your intended path.

The available advanced all-wheel drive (AWD) with automatic front axle disconnect seamlessly transitions between rear-wheel drive and AWD with no driver intervention. The system provides power on demand between the front and rear differentials as needed. When AWD is not necessary, the system automatically disconnects the front axle and opens the transfer case from the drivetrain to reduce friction and rotational mass and maximize fuel efficiency to a class-leading[1] 27 mpg* highway.

*EPA estimated 18 mpg city/27 mpg highway. Actual mileage may vary.

Charger R/T shown in Redline Red Tri-Coat Pearl with available All-Wheel Drive Sport Appearance Package.

POWERFUL INSIDE AND OUT. The name is iconic. The design is modern. The feeling you get when you're behind the wheel is rousing. And that's the difference between Charger and anything else in its segment.

The race-inspired details, bold colors, premium soft-touch surfaces and available performance Nappa leather-trimmed seats with suede inserts flood the driver-centric cockpit. You'll feel confidently in control with your hand on the available leather-trimmed three-spoke steering wheel with die-cast paddle shifters. Gauges on the Billet Aluminum instrument panel feature LED lighting for easier reading, while the full-color Electronic Vehicle Information Center (EVIC) features driver-selectable vehicle and personal settings. All pillars are fabric wrapped, which speaks volumes to Charger's craftsmanship and refinement.

YOU:OWN:THIS

Charger SXT Plus shown in Black Nappa leather-trim with available ventilated seats.

WELL-CONNECTED. Engineered with technology, Uconnect® brings a range of communication and entertainment services straight to your Charger. Intuitive and customizable, available Uconnect systems include a touch-screen display up to 8.4 inches and steering wheel-mounted controls that operate features like a Bluetooth® enabled phone, Voice Command[4], navigation, radio, cruise control and more. ***BEATS AUDIO.™*** Keep the interior tuned as tightly as the performance with the available Beats Audio Premium Sound System. Tuned by Dr. Dre himself, specialized fully-integrated speakers allow you to not only hear the music but to feel it. Reach the peak of your desired tuning through the available Uconnect 8.4-inch touch screen, allowing music selections from your tunes library, radio, CD and any compatible device that puts you in the booth with your favorite artists. Beats Audio includes an additional 50 watts of power per channel, meticulously tuned to play music the way the artist intended it to be heard; 10 premium speakers with a 552-watt amplifier; a subwoofer and enclosure in the shoulder of the trunk; and the commitment of Dr. Dre and the Beats Electronics team. Beats Audio is standard on R/T Max and available on R/T Road & Track, and is included in the following packages: Rallye Appearance Group, Redline Package, Blacktop Package and Wheels and Tunes Group.

BLIND SPOT MONITORING (BSM)[3] WITH REAR CROSS-PATH DETECTION[4]

Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminating icons on the sideview mirrors and by audible chime. The system includes Rear Cross-Path Detection,[4] which monitors for vehicles/objects in perpendicular relationships to the vehicle while backing out of tight parking spots. Available.

PARKSENSE® REAR PARK ASSIST[5]

When in Reverse, sensors detect the presence of objects within 6.5 feet in the backup pathway and provide both an audible chime and a visual warning. Available.

RAIN BRAKE SUPPORT.

When the windshield wipers have been activated, it pulses the brake pads closer to the spinning rotors — helping keep the rotors and pads dry for greater control and operator security.

FORWARD COLLISION WARNING (FCW).[4]

Radar sensors detect when a vehicle may be approaching an object too rapidly, alerting the driver with both an audible chime and a visual warning. Available.

ADAPTIVE CRUISE CONTROL (ACC)[7]

This system automatically adjusts cruising speed to maintain a preset distance between your vehicle and the one ahead. Available.

READY ALERT BRAKING (RAB).

This standard feature utilizes intelligent software connected to the brake pedal and system. It can sense the rate of pressure on the brake pedal and, when it senses an emergency stop, it instantly applies the greatest possible pressure to the brakes, stopping the vehicle in the shortest time possible.

TOP SAFETY PICK

SAFETY:TECHNOLOGY

AUTHENTIC DODGE ACCESSORIES

Dodge Charger. A nameplate born when muscle cars ruled the road and the only thing better than owning one was customizing one. In that spirit, Mopar® offers quality parts and accessories made to give your Charger a custom look and feel or a performance boost. Choose from authentic parts such as Lower Front Fascia Air Dam, Cold Air Intake Kit, Anti-Sway Bars, Pistol Grip Shift Handle, Bright Pedal Kit and more.

And when you choose Mopar, you'll keep going strong with our expert technicians, Mopar Vehicle Protection™ plans, Express Lane Service and the online Mopar Owner Connect™ Web site (register at owners.dodge.com). In short, Mopar support is ongoing—to keep your Dodge Charger at its best. See your Dodge dealer, or visit mopar.com for more information.

[1] Based on third-party testing. [2] No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. [3] Based on 2013 Kbird's Large Regular Car vehicle segmentation. Excludes other Chrysler Group LLC vehicles. [4] Requires Uconnect Phone. [5] Always check visually for vehicles prior to changing lanes. [6] Always look before proceeding; electronic drive aid is not a substitute for conscientious driving; always be aware of your surroundings. [7] ACC is a driver's convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. [8] FCW system is solely an alert system for the front of the vehicle which does not take any actions to change the vehicle dynamics to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. [9] Always sit properly with the head restraint properly adjusted. Never place anything in front of the head restraint. [10] The Advanced Front Air Bags in this vehicle are certified to the new U.S. federal regulations for advanced air bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. [11] SiriusXM services require subscriptions, sold separately after the 12-month trial included with the new vehicle purchase. **If you decide to continue your service at the end of your trial subscription, the plan you choose will automatically renew and bill at then-current rates until you call SiriusXM at 1-866-635-2349 to cancel.** See SiriusXM Customer Agreement for complete terms at www.siriusxm.com. All fees and programming subject to change. Our satellite service is available only in those at least 18 and older in the 48 contiguous USA and D.C.
