FAST, EASY, RELIABLE. OnStar with 4G LTE

provides a better in-vehicle experience than you'll get with your smartphone. Our stronger signal means you have a reliable connection!

SAFETY

WE'VE GOT YOUR BACK. AND FRONT. AND SIDES.

ADAPTIVE CRUISE CONTROL. This available feature enhances cruise control by allowing the vehicle to automatically follow a detected vehicle at the driver-selected following gap, reducing the need to frequently brake and accelerate.

LANE KEEP ASSIST. At speeds above 37 mph, this available camera-based system monitors road lines and will gently turn the steering wheel if the vehicle begins changing lanes without the use of a turn signal.

FRONT AUTOMATIC BRAKING. If the system determines a front-end collision is imminent with a detected vehicle ahead, and the driver has not already applied the brakes, this available system automatically engages the brakes to help reduce the collision's severity. The system may even help avoid contact at very low speeds.

SIDE BLIND ZONE ALERT. This available feature uses radar sensors on both sides of the vehicle to help "look" for other vehicles in your side blind zone areas and indicates their presence with LED-lit symbols in the exterior mirrors.

LANE CHANGE ALERT. Working with available Side Blind Zone Alert, available Lane Change Alert employs radar sensors in the rear quarter panels to help detect and alert the driver to fast-approaching vehicles in the adjacent lane from up to 230 feet away, not just in the side view mirror blind zones.

FORWARD COLLISION ALERT. This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Tahoe is following a detected vehicle much too closely.

REAR CROSS TRAFFIC ALERT. Using the same radar sensors as the available Side Blind Zone Alert feature, available Rear Cross Traffic Alert helps alert drivers to approaching

traffic when backing up. If an approaching vehicle is detected, the driver is warned with visual and audible alerts.

REAR VISION CAMERA. Standard on Tahoe, the rear vision camera displays a view of the area immediately behind the vehicle on the 8-inch diagonal color touch-screen – making it easier to see what's behind you while backing up.

FRONT AND REAR PARK ASSIST. Ideal when pulling into a parking spot at low speeds, the available system senses stationary objects and warns you if an object is too close. As you shift into Reverse, the rear vision camera automatically displays a live image of the area behind the vehicle on the Chevrolet MyLink screen and includes guiding lines to help when backing up.

INTELLIBEAM HEADLAMPS. When oncoming headlamps are sensed or when taillamps are detected in front of you, the available IntelliBeam® high beam assist intuitively adjusts between low and high beams.

SAFETY ALERT DRIVER SEAT. The available Safety Alert Driver Seat uses directional vibration pulses from the seat cushion instead of audible crash avoidance alerts to help indicate the direction of potential collision threats. This patented warning approach is tied into other onboard avoidance systems.

THEFT PROTECTION PACKAGE. Protect your investment with the GM class-exclusive available Theft Protection Package that includes glass breakage sensors, interior motion detectors and a revolutionary inclination sensor that measures any tilt of the vehicle.

SAFETY STARTS WITH YOU. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the Tahoe Owner's Manual for more important safety information.
