SAFETY

Traverse LTZ in Silver Ice Metallic with available features.

OVERALL VEHICLE SCORE FOR SAFETY.¹

— NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

FRONT CENTER SIDE-IMPACT AIR BAG The available industry-first Front Center Air Bag² deploys from the right side of the driver seat and positions itself between the front seats for added cushioning and restraint to help protect the driver and passenger from colliding with one another in the event of a side-impact collision.

ONSTAR AUTOMATIC CRASH RESPONSE³ In a crash, built-in sensors can alert a specially trained OnStar Advisor who is connected into your Traverse to see if you need help — even if you can't ask for it. Advisors can use GPS technology to pinpoint your location and request emergency help. OnStar is standard for six months.

REAR VISION CAMERA When traveling in reverse at low speeds, the rear vision camera provides a real-time picture of the area immediately behind your Traverse on the 6.5-inch diagonal color touch-screen display.

¹ Government 5-Star Safety Ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.SaferCar.gov).

² A NOTE ON CHILD SAFETY: Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See the Owner's Manual and the child safety seat instructions for more safety information. ³ Visit onstar.com for details and system limitations. OnStar acts as a link to existing emergency service providers. Not all vehicles may transmit all crash data.

STABILITRAK[®] ELECTRONIC STABILITY CONTROL SYSTEM This innovative safety technology is designed to improve vehicle stability on most road surfaces, especially during emergency maneuvers and difficult driving conditions.

Travel with confidence in the 2016 Traverse LTZ. Ingenious patented safety technologies provide peace of mind, making every drive more enjoyable.

LANE DEPARTURE WARNING. If you unintentionally drift out of your lane (without a turn signal), this camera-based system sends an alert. The camera, mounted near the inside rearview mirror, reads traffic lane markings when

identifiable and provides audible and visual alerts (standard on LTZ).

SIDE BLIND ZONE ALERT. With radar sensors on both sides of the vehicle, Side Blind Zone Alert helps to “look” for other vehicles in your side mirror blind zones and indicates their presence with LED-lit symbols in the exterior mirrors (standard on LTZ and available on 2LT).

FORWARD COLLISION ALERT. This safety feature identifies vehicles ahead and alerts the driver to any potential front-end crash risks, helping provide time to stop and/or change course (standard on LTZ).

REAR CROSS TRAFFIC ALERT. Using the same radar sensors as the Side Blind Zone Alert system, this available feature alerts you to crossing traffic behind your Traverse when backing up. Audible warnings, as well as visual alerts on the rear vision camera

screen, are triggered if approaching vehicles are detected (standard on LTZ and available on 2LT).

SAFETY STARTS WITH YOU. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the Traverse Owner's Manual for more important safety information.

PERFORMANCE

**CAPABILITY OR EFFICIENCY.
CHOOSE TWO.**

Traverse LTZ in Tungsten Metallic
with available features.

REVVED UP. With more horsepower and torque than Toyota Highlander, Traverse lets you make the most out of every mile – and enjoy every minute of it. The catalyst is a spirited yet efficient direct injected 3.6L V6 engine that offers a winning combination of up to 288 horsepower and 24 MPG highway.¹

TONS OF TOWING POWER. A properly equipped Traverse can tow up to 5,200 lbs.² That's capability unrivaled by any Ford Explorer or Toyota Highlander.

ALL-WHEEL-DRIVE CONFIDENCE. Available all-wheel drive helps maintain sure-footed traction in all types of weather and road conditions. The tuned 4-wheel independent suspension delivers confident response and an ultra-smooth ride.

¹ Based on EPA estimates for FWD models. ² Before you buy a vehicle or use it for trailering, carefully review the Trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow.
