LITHIUM-ION BATTERY The advanced 18.4-kWh lithium-ion battery was designed to be lightweight, powerful and efficient. The all-new battery cell delivers 20 percent more energy by volume!¹

GENERATOR When the battery runs low, the gas-powered generator kicks in to extend range an additional 360 miles.²

ELECTRIC DRIVE UNIT The Electric Drive Unit propels the vehicle with energy either from the vehicle's battery or its range-extending gas-powered generator, making Volt the electric vehicle with a backup plan.

REGENERATION Volt empowers you to put energy back into the battery through regenerative braking and a steering wheel-mounted Regen on Demand™ paddle.

¹ Comparison to initial 2011 Volt battery cell. ² EPA-estimated 53-mile EV range based on 106 MPGe combined city/highway (electric); 367-mile extended range based on 42 MPG combined city/highway (gas). Actual range varies with conditions.

Volt Premier in Siren Red Tintcoat (extra-cost color) with available features and dealer-installed Illuminated Charge Port from Chevrolet Accessories.

TWO CHARGE OPTIONS: FAST & FASTER. Volt can be recharged with a 120-volt portable cord that will charge the battery in approximately 13 hours! There is also an available 240-volt charger that can charge the battery in 4.5 hours. (Professional installation required.)

CHARGE WHEN IT'S CONVENIENT. With home and away settings for recharging, the 2016 Volt lets you take advantage of off-peak hours when you're at home or begin charging immediately when you've reached your destination.

KEEP TABS ON HOW YOU'RE DRIVING. How will you use your power? The Power Flow screen allows you to monitor how you're using the charge in your Volt.

¹ Using the 120-volt portable charger will take approximately 19 hours at the default 8-amp setting and can be reduced to 13 hours at the 12-amp setting. Actual time may vary with temperature.

EXTERIOR DESIGN

Volt Premier in Kinetic Blue Metallic
(extra-cost color) with available features.

DESIGNED TO STAND OUT. Form meets function in the 2016 Volt. It starts with a sculpted look that evolves the vehicle while remaining true to the first-generation DNA. With a finely tuned exterior and a redesigned grille, Volt was built for performance and efficiency.

PLENTY OF OPTIONS. The new Volt elevates the look and feel of the first-generation vehicle in every way. Volt comes in two trim levels and with multiple color and wheel choices. So it's easy to make Volt match your own unique personality.

LOOKS MEETS BRAINS. Volt designers gave the vehicle a sportier look without sacrificing intelligent features. Its exterior redesign features a more muscular look with finely tuned aerodynamics. And its carved body and upper and lower grille pads give Volt an identity of its own.

INTERIOR DESIGN

EASY ACCESS TO YOUR APPS. With Apple CarPlay™ compatibility¹ you can interact with select iPhone® apps. This system takes some of your iPhone features and puts them on your vehicle's display. You'll have access to Phone, Music, Maps and Messages, as well as some of your favorite audio apps (e.g., iHeartRadio², Spotify²).

A COMPLETELY REDESIGNED AND MORE INTUITIVE INTERIOR.

1. Apple CarPlay¹ lets you interact with select apps in a smart, simple manner through Chevrolet MyLink.³
2. The reflective gearshift is both inviting and intuitive.
3. The highly crafted interior provides a refined driving experience.
4. With functional cargo space and room for five passengers, there's no room for compromise.

¹ Vehicle user interface is a product of Apple and its terms and privacy statements apply. Requires compatible smartphone and data plan rates apply. ² Data plan rates apply. ³ Full functionality requires compatible Bluetooth and smartphone, and USB connectivity for some devices.

TECHNOLOGY

Connected by  4G LTE

Volt Premier in Siren Red Tintcoat (extra-cost color) with available features.

AVAILABLE INTERNET IN YOUR VOLT.

Chevrolet is the first and only car company to offer built-in 4G LTE Wi-Fi® to cars, trucks and crossovers, providing the ability to seamlessly connect your smart devices and vehicles to the Internet!

THE ULTIMATE BUILT-IN WI-FI HOTSPOT.

After initial setup, whenever your Volt is on, available 4G LTE Wi-Fi is automatically on too. It offers great signal quality and bandwidth for up to seven devices!

FAST, EASY, RELIABLE. OnStar with 4G LTE provides a better in-vehicle experience than you'll get with your smartphone. Our stronger signal means you have a reliable connection!

¹ Requires a compatible mobile device, active OnStar service and data plan. 4G LTE service available in select markets. Visit onstar.com for coverage map, details and system limitations.

MAKING SMARTPHONES SMARTER.

With an available wireless charging feature,¹ the 2016 Volt makes it easier to keep your smartphone fully powered. Simply equip your phone with an accessory backplate or case, so you can keep your phone charged on the go.

STAY IN THE KNOW WITH REMOTELINK.

The OnStar Basic Plan,² which doesn't include Emergency Services, keeps you connected to your car for five years at no additional cost. The RemoteLink mobile app³ allows you to remotely start, lock or unlock the doors of your Volt from anywhere there is a cellular connection.

¹ The system wirelessly charges one PMA- or Qi-compatible mobile device. Some devices require an adaptor or back cover. To check for phone or other device compatibility, visit my.chevrolet.com/learn for details. ² Does not include emergency or security services. Visit onstar.com for coverage map, details and system limitations. ³ Requires compatible mobile device and active OnStar subscription. Visit onstar.com for details and system limitations.

WE'VE GOT YOUR BACK. AND SIDES. AND FRONT.

LOW-SPEED FRONT AUTOMATIC BRAKING.

If the vehicle is traveling at low speeds and the system determines a front-end collision situation is imminent with a detected vehicle ahead, and the driver has not already applied the brakes, this available system automatically engages the brakes to help reduce the collision's severity. The system may even help avoid contact at very low speeds.

FORWARD COLLISION ALERT.

This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Volt is following a detected vehicle much too closely.

LANE KEEP ASSIST. At speeds above 37 mph, the available camera-based system monitors road lines and will gently turn the steering wheel if the vehicle begins changing lanes without the use of a turn signal.

SIDE BLIND ZONE ALERT. This available feature uses radar sensors on both sides of the vehicle to help "look" for other vehicles in your side blind zone areas and indicates their presence with LED-lit symbols in the exterior mirrors.

LANE CHANGE ALERT. Working with available Side Blind Zone Alert, available Lane Change Alert employs radar sensors in the rear quarter panels to help detect and alert the driver to fast-approaching vehicles in the adjacent lane from up to 80 feet away, not just in the side view mirror blind zones.

REAR CROSS TRAFFIC ALERT.

Using the same radar sensors as the available Side Blind Zone Alert feature, available Rear Cross Traffic Alert helps alert drivers to approaching traffic when backing up. If a vehicle is detected, the driver is warned with visual and audible alerts.

REAR VISION CAMERA. The standard rear vision camera uses an 8-inch diagonal color touch-screen display to show the area behind your Volt while you are backing up.

AUTOMATIC PARKING ASSIST.

This available, ingenious system enables Volt to detect viable parking spaces, determine approach angles and take over

the steering to neatly maneuver into an available space. Throttle, brake and gear selection input is still required by the driver, but the vehicle steers itself into any suitable-sized parallel or perpendicular (90-degree) parking spot.

FRONT AND REAR PARK ASSIST.

Ideal when pulling into a parking spot at low speeds, the available system senses stationary objects and warns you if an object is too close. As you shift into Reverse, the rear vision camera automatically displays a live image of the area behind the vehicle on the Chevrolet MyLink screen and includes guiding lines to help when backing up.

INTELLIBEAM HEADLAMPS.

When oncoming headlamps are sensed or when taillamps are detected in front of you, the available IntelliBeam® high beam assist intuitively adjusts between low and high beams.

SAFETY STARTS WITH YOU.

Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the Volt Owner's Manual for more important safety information.

ENGINES Chevrolet products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM makes and models.

ASSEMBLY Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

ONSTAR OnStar services require vehicle electrical system (including battery), wireless service and GPS satellite signals to be available and operating for features to function properly. A NOTE ON CHILD SAFETY Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See the Owner's Manual and child safety seat instructions for more safety information.

IMPORTANT WORDS ABOUT THIS CATALOG We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Chevrolet

dealer for complete details. Chevrolet reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Compact Car segment and latest available competitive information. Excludes other GM vehicles.

SPARE TIRE INFORMATION There is no standard jack or spare tire in the 2016 Chevrolet Volt. Your vehicle has a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a one-quarter-inch puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 100 miles of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than one-quarter inch, or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date.
