For more than 100 years, the Dodge Brand has stood for standing out. We've led by being different. By offering the unexpected, by having a different voice altogether and daring to amplify it. We've stood apart in a sea of look-alike vehicles by championing the un-boring; by having the courage to be different enough to build modern-day marvels that are engineered with more passion, precision and performance than ever before. Each vehicle in the 2018 Dodge lineup pays homage to its iconic bloodline with award-winning features and detailed craftsmanship. The snarling engines and sleek exteriors of each vehicle beg to be taken out on the open road. It's time to put the pedal to the metal. ***THIS IS WHAT IT MEANS TO BE DOMESTIC AND NOT DOMESTICATED.***

MOTOWN

MUSCLE

WE IGNORE THE STATUS QUO AND DO THINGS OUR WAY. WE BELIEVE PERFORMANCE IS EQUAL PARTS ATTITUDE, PERSONALITY AND HORSEPOWER. HIGH-PERFORMANCE IS OUR BIRTHRIGHT AND DEFIANCE IS IMPRINTED ON OUR DNA.

NHRA CHAMPIONSHIP DRAG RACING

2035 FINANCIAL WAY, GLENDORA, CALIFORNIA 91741-4602 • (626)914-4761

To: FCA US LLC, regarding its Dodge brand

Date: November 30, 2016

This letter verifies that on Monday, November 21st, 2016 at Gainesville Raceway in Gainesville, Florida, the Dodge Challenger SRT Demon ran the quarter mile in an elapsed time of 9.650 seconds at 140.09 miles per hour. Both the elapsed time and the speed on this run exceeded the limits on 2008 OEM model-year and newer production cars and therefore violate our rules. The car exceeded our limits of 9.99 seconds and 135 miles per hour. Therefore, before this car can be run again at an NHRA Member Track, it must be brought into compliance with the rules and regulations found in Section 4 of the NHRA Rulebook. If you have any questions concerning this letter or the rules in Section 4 of the NHRA Rulebook, please contact me.

Sincerely,

Glen Gray
NHRA
Vice President, Technical Operations

DEMON

OFFICIALLY BANNED BY THE NHRA

Dodge is a registered trademark of FCA US LLC

SORRY. NOT SORRY.
SRT

TOO DAMN FAST

DODGE DEMON® // Strap yourself into Demon's available 4-point harness. The Red key brings the powerful V8 to life. Activate Drag Mode and, instantly, your suspension recalibrates for maximum weight transfer. The A/C diverts from cabin to super-cool your intake air charge. Roll into the water-box and activate Line Lock. The massive Nitto drag radials spin to over 200 degrees. You'll hear them gripping and pulling at the track as you creep forward to the starting line. You're now pre-staged and only seven inches away from countdown. Torque Reserve? Check. Trans-Brake? Check. The supercharger bypass valve closes. Eight pounds of boost build in the manifold waiting for the Trans-Brake release. The yellows go out and you're gone. 1.8 gs and you've cleared the tower. The launch is so violent that over a TON of mass is transferred to the rear of the car, lifting the front wheels off the ground and carrying them for nearly 3 feet. One second into the hit and you're already doing 30 miles per hour. Still pinned to the back of your seat holding over 1.3 gs ... BANG! Second gear ... third gear. You just passed 60 mph and you're only 2.3 seconds in! At the 5.1-second mark, you're passing 100 mph. It's just you and Demon and one simple goal: GO DOWN THAT QUARTER MILE FASTER THAN ANYONE ELSE CAN. In 9.65 seconds, you cross the line at 140 mph. What you did there was make history.

///// Challenger SRT® Demon shown in TorRed.

Unleash Demon's full fury with the contents of the official Demon Crate. Available only to owners and only for a buck, the kit has all the tools and components needed to run Demon down the drag strip. Each crate is fully customized with the buyer's name, VIN and serial number.

HELL, YEAH

///// Shown below left: Challenger SRT Hellcat® interior shown in Black Laguna leather with perforated leather inserts with embossed SRT Hellcat logo.

DODGE HELLCAT // IF YOU KNOW, YOU KNOW // When you have the guts to give drivers 707 horsepower, 650 lb-ft of torque and a staggering quarter-mile time, you get the glory of having arguably two of the most coveted cars on the road. Both Challenger SRT Hellcat® and Charger SRT Hellcat house a Supercharged 6.2-liter SRT Helicat HEMI® V8 engine with upgraded components to withstand the brutal performance. The Supercharger houses internal charge coolers and an integrated electronic bypass valve. The twin-screw rotors are specially treated to accommodate tighter internal tolerances between the rotors and help improve overall performance. In Challenger, air is delivered into the engine's air box via the Air Catcher™ Inlet Port located in the driver's side parking lamp. A 92mm throttle body controls airflow into the Supercharger, air charger coolers and then into the inlet port. The Bilstein® Three-Mode Adaptive Damping Suspension on both models provides selectable driving dynamics settings that adjust shocks and transmission shifts to suit any drive — Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling). These Drive Modes tailor the driving experience by controlling horsepower, transmission shift speeds, paddle shifters, traction control and suspension settings. Drive Modes are pre-configured for Sport, Track and Default settings, while the Custom Mode allows the driver to configure their own unique driving experience.

///// Charger SRT Hellcat shown in Go Mango, Challenger SRT Hellcat Widebody shown in F8 Green and Challenger SRT Hellcat shown in Yellow Jacket.

LEADERS OF THE PACK

CHALLENGER AND CHARGER R/T SCAT PACK // Direct from the factory both vehicles boast cold-air induction, while Challenger offers an available full floating, open-element Shaker hood scoop. The legendary 392 HEMI® V8 engine unleashes 485 horsepower and 475 lb-ft of torque for intense power. Four-piston Brembo® brakes, 3-mode Electronic Stability Control (ESC)[11]* with Full-Off Mode, high-performance suspension with Bilstein® shocks, 20x9-inch wheels and available Three-Season Performance tires work together to bring top-shelf control. The interior merges retro styling with modern technology. Race-inspired seats feature the famed Scat Pack logo embroidered on either standard high-performance premium cloth or available Nappa leather trim with Alcantara® suede inserts. Standard on the R/T Scat Pack model, Dodge Performance Pages feature everything from Launch Control to a g-force meter to drag-race timers. This real-time data can also be displayed on either the 8.4-inch Uconnect® touchscreen or the standard seven-inch reconfigurable digital display nestled between the gauges. For an even greater degree of personalization, both Challenger R/T Scat Pack and Charger R/T Scat Pack have customizable settings that can be accessed through the standard Uconnect touchscreen to give the driver the ability to adjust steering feel, transmission shift points and throttle response.

//// Charger R/T Scat Pack shown in TorRed. *All disclaimers can be found on page 46.

///// Challenger SRT Hellcat® Widebody shown in Plum Crazy.

//// **TRUE CLASSICS NEVER GO OUT OF STYLE //** Challenger seamlessly melds retro styling with fierce attitude. It starts with a heritage split-grille surround, a power-bulge hood with functional inlets, and menacing projector headlamps with quad halo LED surrounds that nod to the famed '71 model. From the rear, bold, seamless split LED taillamps finish off the intimidating stance. Slide inside and the heritage-inspired Houndstooth cloth seats or available Slack Nappa leather with Alcantara suede seats take you back to a different era. The available front performance seats feature comfortable contours, and large side bolsters help provide maximum lateral support. Charger's attitude is so intense, it's impossible to ignore. The first glance sends shivers. The second begs you to slide your hand along its low, lean profile and scalloped body side. The imposing grille leaves no question where this retro-modern muscle came from. Tip-to-tail, Charger commands authority with projector headlamps and LED lighting. The feeling of power doesn't dissipate once inside. Instead it grows as you grip the thick-rim three-spoke Sport steering wheel. Available paddle shifters with rev-matching capability bring track-inspired performance to the everyday drive.

///// Charger Daytona 392 shown in Go Mango and Challenger T/A 392 shown in B5 Blue.

WEATHER OR NOT, HERE WE COME // Designed for uncompromising performance, Challenger GT all-wheel drive (AWD) and Charger GT AWD deliver massive control exactly when you need it. Advanced automatic front axle disconnect technologically intuitively and seamlessly transitions between rear-wheel drive (RWD) and AWD without driver intervention. Under normal driving conditions, the front axle is disengaged and 100 percent of the engine's torque is directed to the rear wheels. When sensors indicate more traction is needed, the system automatically engages the front axle and instantly transitions to AWD mode.

These systems work with the vehicles' Electronic Stability Control (ESC)[11] system to deliver precise front-to-rear torque control while preserving Challenger and Charger's unrelenting drive. Challenger AWD also employs Vehicle Dynamic Control (VDC), which provides exceptional traction on slippery surfaces while helping the driver maintain the desired vehicle path.

YEAR-ROUND

ACTION

TRACK-PROVEN TUNED CHASSIS High-demanding track conditions require tightly engineered hardware. Challenger R/T Scat Pack, Charger R/T Scat Pack and Challenger 392 HEMI® Scat Pack Shaker showcase a high-performance tuned chassis that's ready to go.

SHOCK ABSORBERS Bilstein® high-performance shock absorbers are precision-damped to help provide a confident, smooth ride for the everyday commute while being capable for weekend track duty.

SUSPENSION Options range from Sport-tuned to high-performance to the top-of-the-line competition suspension featuring adaptive damping. A bold combination of movement and staying power comes from a sophisticated suspension geometry and rear-wheel drive. Whether it's the everyday commute or more challenging driving situations, the independent five-link rear suspension is finely tuned to help provide superior handling and a comfortable ride. When the rubber meets the road, a lower unsprung mass helps maintain better tire contact with the ground and reduces road noise. Models equipped with a 392 HEMI V8 engine feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allow these performers to achieve 0.93 g on the skid pad — on par with some of the world's best-handling cars. The Bilstein Three-Mode Adaptive Damping Suspension on Challenger SRT® and Charger SRT models takes drivers from Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling).

AGGRESSIVE FRONT- AND REAR-CAMBER GEOMETRY Performance handling requires maximum road-holding grip, and Challenger and Charger Scat Pack models deliver with aggressive front- and rear-camber geometry. Set at –1.2 degrees in the front and –0.75 degrees in the rear, Challenger is set up for high-speed cornering with its tires leaning inboard at the top relative to the body.

BRAKES Standard 4-wheel antilock disc brakes provide solid stopping power. Available Brembo® performance brakes feature vented rotors that provide superior braking performance when paired with wind-tunnel designed brake ducts.

SAFETY & SECURITY FEATURES

PARKVIEW® REAR BACK-UP CAMERA[12] // This system displays the area behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard on Charger and Challenger.

PARKSENSE® REAR PARK ASSIST[12] // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Standard on Charger, available on Challenger.

BLIND SPOT MONITORING (BSM)[4] WITH REAR CROSS-PATH DETECTION[12] // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminating icons in the sideview mirrors and by audible chime. The system includes Rear Cross-Path Detection,[7] which monitors for vehicles and objects in perpendicular relationships to the vehicle while backing out of tight parking spots. Available on Challenger and Charger.

ADAPTIVE CRUISE CONTROL (ACC)[10] // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead. Available on Challenger. On Charger, this system can bring the vehicle to a full stop without driver intervention.

FULL-SPEED FORWARD COLLISION WARNING (FCW) WITH ACTIVE BRAKING[11] // Radar and camera technology combine to alert you when the system senses potential frontal impact. If you're not able to respond quickly enough, the system will automatically engage the brakes with the ability to bring the vehicle to a complete stop. Available on Charger. On Challenger models, FCW[7] transmits audible and visual warnings. Warning sensitivity can be adjusted to driver preference.

LANESENSE® LANE DEPARTURE WARNING (LDW) WITH LANE KEEP ASSIST[3] // This system measures your position within lane boundaries. If it detects an unintentional lane drift, it will alert you and correct the vehicle back into the lane. Available on Charger.

ELECTRONIC STABILITY CONTROL (ESC)[1] // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC[1] senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard on Charger and Challenger.

RAIN-SENSITIVE WINDSHIELD WIPERS // System sensors automatically detect moisture on the windshield and activate the wipers. Available on Challenger and Charger.

READY ALERT BRAKING // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC[1] pump to precharge the brake system in order to decrease the time required for full brake application. Standard on Challenger and Charger.

RAIN BRAKE SUPPORT // When your car's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard on Challenger and Charger.

uconnect

HERE'S WHAT YOU CAN DO. REMAIN FOCUSED ON THE ROAD WITH YOUR HANDS ON THE WHEEL, WHILE YOU COMMUNICATE, NAVIGATE AND STAY ENTERTAINED.

// LISTEN to music, talk shows and sports. Access all genres, favorite artists, winning teams — all the time with SiriusXM® Satellite Radio[6]. **// DISCOVER** new places, find the best shopping, dancing, entertainment venues and restaurants **// SPEAK UP** and be heard, send and receive calls and texts[7] while driving safely with hands-free phone capability[8] **// NAVIGATE**[9][10] to every adventure, get turn-by-turn directions so you don't get lost on the way (unless you want to) **// START** your car from afar, unlock your doors or flash your headlamps from almost anywhere using your smartphone **// SEE** into the future, hear weather and traffic reports* with a five-year trial subscription to SiriusXM Travel Link[11] and SiriusXM Traffic[11].

APPLE CARPLAY™ COMPATIBILITY[12]

This is smarter iPhone integration, so you'll experience your favorite features through your dashboard. With Siri[13] all you have to do is ask — catch up on calls and messages, get directions from Apple Maps, or request a song through Apple Music. The system lets you browse music, or discover nearby gas stations, parking, restaurants and more. Plus, Maps help predict where you're headed.

Works with Apple CarPlay[12]

ANDROID AUTO™ INTEGRATION[12]

For those who know and love Android,™ Google™ goes with you with navigation[11] and "OK Google" voice detection, you'll hear your favorite Google Play music and get voice-guided navigation[11] from Google Maps. Stay focused and productive while on the road with voice controls[14] that allow you to make calendar appointments, set timers, reply to emails and messages — and more.

BONDURANT®

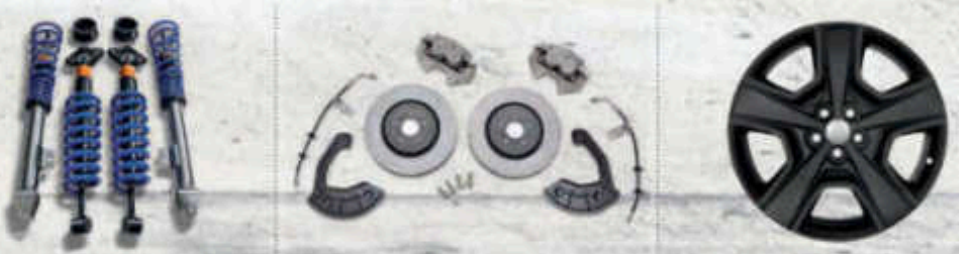
THE OFFICIAL RACING SCHOOL OF DODGE SRT

DODGE.COM/LIFE

DODGE GOODS

Check out an extensive line of gifts and accessories for the Dodge enthusiast. From authentic apparel to die-cast replica cars for the collector, as well as electronics and office supplies, all lifestyle items are as bold as your Dodge vehicle. Refer to **dodge.com/life** for our full product lineup.

CHALLENGER, CHARGER AND MOPAR® ///// These names are iconic for a reason; they're the names that set the muscle car movement in motion. Their names take you back to a time when you couldn't earn a place on the strip unless your car was tricked out with performance parts or racing stripes. Today, these automotive legends still stand for standing out. Mopar offers a wide range of authentic parts and accessories designed and manufactured by the same people who design and manufacture Challenger and Charger. The lineup ranges from Stage Kits to Shaker Hood Packages to custom wheels to unique performance badging. Regardless of which performance or appearance enhancements you choose for your Dodge, you can be sure that you'll be bringing a new set of bragging rights to the table.



MOPAR ACCESSORIES /////
Performance Suspension Kit, Big Brake Kit, 20-inch Black Envy Wheel

Dodge is a registered trademark of FCA US LLC

(1) No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. (2) Always look before proceeding; electronic drive aid is not a substitute for conscientious driving; always be aware of your surroundings. (3) LDW is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collisions. (4) Always check visually for vehicles prior to changing lanes. (5) FCW system is solely an alert system for the front of the vehicle which does not take any actions to change the vehicle dynamics to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. (6) SiriusXM subscriptions for audio and data services are sold by SiriusXM to follow your trial subscription. **If you decide to continue listening after your trial, the subscription plan you choose will automatically renew thereafter and you will be charged according to your chosen payment method at then-current rates.** Fees and taxes apply. To cancel, you must call SiriusXM at 1-866-635-2349. See the SiriusXM Customer Agreement for complete terms and get more information at www.siriusxm.com. All fees and programming subject to change. Your equipment and features for SiriusXM services will vary depending upon the vehicle you select and may be limited in select markets. (7) Voice Text Reply and Voice Texting features require a compatible mobile device enabled with Bluetooth Message Access Profile (MAP). iPhone and some other smartphones do not currently support Bluetooth MAP. Ensure MAP is ON and incoming message notification is enabled. Also requires the use of a compatible smartphone that supports text messaging and Bluetooth. Visit UconnectPhone.com for system and device compatibility. (8) Requires a mobile phone equipped with the Bluetooth Hands-Free Profile. Visit UconnectPhone.com for system and device compatibility. (9) ACC is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. (10) The Advanced Front Air Bags in this vehicle are certified to the new U.S. federal regulations for Advanced Air Bags. Children 12 years old and younger should always ride buckled up in a rear seat; infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. (11) Always sit properly with the head restraint properly adjusted. Never place anything in front of the head restraint. (12) Apple CarPlay and Android Auto require a compatible mobile device connected via USB cable to the Uconnect system. Data plan rates may apply. Visit UconnectPhone.com for system and device compatibility. (13) This system is not meant to be used while the car is in motion. (14) Siri Eyes Free requires an iPhone equipped with Siri. Certain features not available while the vehicle is in motion. iPhone must be within active cellular range. Customer's existing iPhone data rates apply to Internet-supported features. (15) May not work with all garage door openers. (16) Transferable. See dealer for complete details and a copy of the 5-Year/60,000-Mile Powertrain Limited Warranty.
