

We're
full of
surprises.

Full-filled. *From its aggressive, Ram-inspired lines to the thunderous response of its Magnum® power, this performance-oriented compact pickup gives a feeling of authority every time it hits the road.*

Dodge Dakota offers the only available V8 in its class. The highest payload and towing ratings. The roomiest-in-class interior. And an innovative cargo bed that converts into two separate spaces. Dakota also gives you a choice of 4x2 or 4x4, regular or Club Cab®, and 6.5-foot or 8-foot cargo bed. And there's the ultimate street truck: Dakota 5.9 R/T. A clear superiority in size and capability has won Dakota a devoted following among sport pickup enthusiasts — and a long list of awards.

These honors include the Truck of Texas Award from the Texas Automobile Writers Association, SmartMoney magazine's "Best Buys of the Year" award for compact pickups, Kiplinger's Personal Finance Magazine "Best in Class" and "First for Safety" awards, Sport Truck of the Year Award for 1997 and 1998 from Sport Truck magazine, and Strategic Vision's award for "Best Ownership Experience" in compact pickups.*

Don't be surprised when you feel the same way.

A mover, not a shaker.

Bring on the rough roads because Dakota's agile suspension includes modified front shocks, staggered rear shocks and front stabilizer bar for improved handling and control. With cushioned engine and cab mounts, you have a truck ride that tames even the toughest rock-crunching bumps.

Beneath Dakota's sturdy suspension there's a stiff, strong frame that can shoulder 30,000 pounds per square inch.

...all stainless steel exhaust system, including muffler and tail pipe, for longer life.
...standard rear-wheel antilock brakes help prevent rear-wheel lockup.
...standard front-wheel disc brakes with 11-inch rotors provide steering control while braking. Get maximum control with optional four-wheel disc antilock brakes which help maintain directional stability under hard braking situations.
...standard 15-gallon and optional 22-gallon fuel tanks are made of high-density polyethylene and mounted within the frame rails for safety.
...stiff three-section carbon steel frame maintains body integrity while allowing full suspension flex.
...cab is isolated from road noise and shocks by six rubber cab mounts onboard of the frame.
...inverted rubber "V" engine mounts, specifically tuned to each engine, reduce power train vibration and interior noise.

...the available 31-inch tires on 4x4 models include 15x8-inch cast aluminum wheels, color-keyed wheel covers and rear stabilizer bar to increase handling performance.

- 9 Double-sealed door openings and flush-mount glass on the 55-degree raked windshield block drafts and seal out road and wind noise.
- 10 Steering geometry engineered for tighter turning circle, faster response and better feedback for significant handling improvement.
- 11 Shift-on-the-fly 4x4 transfer cases allow shifting from 4x2 to 4x4 high gear without stopping, for convenience in varying terrain and traction conditions.
- 12 Skid plate protection for front suspension, transfer case and fuel tank are included in the optional 4x4 protection package.
- 13 Recessed cargo tie-downs are frame-mounted for additional strength.

Dimensions (inches)	Regular Cab Short Bed	Regular Cab [®] Long Bed	Club Cab [®] Short Bed

Exterior Dimensions (inches)

Model	Ground Clearance At Rest		Angle of Approach (Degrees)		Angle of Departure (Degrees)		Breakover Angle (Degrees)	
	4x2	4x4	4x2	4x4	4x2	4x4	4x2	4x4
Regular Cab Short Bed	8.2/9.2	7.3/9.8	22.7	29.0	19.7	22.5	19.0	19.5
Regular Cab Long Bed	8.2/9.4		22.7		17.5		17.4	
Club Cab Short Bed	8.4/9.3	7.1/9.4	23.3	29.1	19.8	22.4	17.6	17.6

Recesses built into the cargo box allow for two-tier loading, giving you the fullest use of Dakota's bed space. And with the only available eight-foot bed in its class, you'll have plenty of room for carrying 4x8-foot sheets of plywood with the tailgate closed.

DAKOTA *SPORT*

Uncomprom

Dakota performance you can rely on with **Magnum**® power for crisp acceleration, superior torque and flexibility from the widest range of engines in the compact pickup class. Shared characteristics of all our Magnum engines include short-stroke design for less friction and

energy loss. Increased strength and rigidity through extra crankshaft overlap and bearing areas. "Barrel" type intake manifolds for greater airflow and combustion. Plus, "high swirl" combustion technology that delivers better fuel mileage and less tendency to knock.

Magnum® Engine Features:

Sequential multipoint fuel injection (SMPI) provides immediate throttle response because fuel is delivered specifically to each cylinder by its own injector.

Progressive-bore throttle body increases horsepower by introducing greater airflow into the combustion process.

Variable lightweight aluminum intake manifold has stronger but thinner walls to increase air volume while helping to get more air into the combustion process.

High-flow exhaust manifolds help move exhaust gases out quickly, maximizing the exhaust flow for increased horsepower.

Overhead-cam valves help air move more quickly into the combustion chamber.

Hardened metal rocker arm fulcrums increase valve train and engine durability.

Extra-thick rocker arm covers with silicone gaskets provide better sealing against dirt and make the engine quieter.

Timing belt accessory drive with automatic tensioner (V6 and V8)

reduces engine vibration and requires less maintenance.

Heavy-duty spark plug wires mean better, longer-lasting

performance through increased conductivity and better heat resistance.

High-flow water pump increases the cooling

system's efficiency.

sing.

Magnum® 2.5L I-4 120 horsepower: Standard on regular and Club Cab® 4x2 Base and Sport models, with 145 pound-feet of torque at 3,250 rpm. Available with a 5-speed manual transmission only.

Magnum 3.9L V6 with 175 horsepower: Standard on all 4x4 SLT models; optional on all others. A gutsy standard V6, delivering 225 pound-feet of torque at 3,200 rpm. Available with a 5-speed manual or 4-speed automatic transmission.

Magnum 5.2L V8 with 230 horsepower: Meet one of only two V8s in the Dakota class. The other one is below. This adrenaline pump sends out 300 pound-feet of torque at 3,200 rpm. Available with a heavy-duty 5-speed manual or heavy-duty 4-speed automatic transmission.

Magnum 5.9L V8: 250 horsepower: Exclusive to Dakota R/T, this engine supplies 345 pound-feet of torque at 3,200 rpm, making it the muscle master in its class. Take control of the 5.9L's muscle with a heavy-duty four-speed automatic transmission.

Pick up, put in, hook

Three simple words: best in class. That's how we describe both Dakota towing and payload. Check out options like the Heavy-Duty Service Group, a choice of three axle ratios, and the Trailer Tow Preparation Group. Take it all around, everywhere you go, Dakota is one hard worker that always comes up smiling.

Properly secure all cargo before transporting.

¹Gross Combination Weight Rating. ²Standard Trailer Tow Weight Allowance is a guide based on an unloaded truck with standard equipment. Higher Trailer Weight Allowances are available with certain power train and axle ratio combinations. Weight allowance must always be reduced by the weight of optional equipment, trailer load, passengers, other than driver, and cargo in truck. Maximum tongue weight depends on the tow weight allowance and the payload. Load-carrying capacity is recommended for all trailers over 2,000 lb. See dealer for details on payload, trailer weight allowances and recommended towing practices. ³Available on Sport models with the R.T. Sport Group. ⁴Not available with I-4 Magnum.

1, haul off...

Dakota R/T is one pickup that hauls, even when loaded. You can fill it with up to 1,275 pounds of your favorite gear or a maximum of 6,400 pounds. Want to haul even more? You can opt for other Dakota models to carry up to 7,000 pounds of cargo. Dakotas equipped with the optional 5.2 liter Hemi® V8 offer a maximum towing capacity of 6,700. In fact, Dakota has a higher-rated axle capacity than any truck in its class. And for the long haul, we offer a 62-gallon fuel tank — the largest in its class.

Driving

It's no wonder Dakota inspires so much loyalty in its owners — it's the ultimate compact pickup. Available interior features include a new overhead console design with Light Group (premium overhead console shown), a driver power window one-touch-down feature, a new removable cassette/CD storage area in the full-floor console, and available remote radio controls conveniently located on the steering wheel.

ambition.

Beneath, beside and in front of Dakota's instrument panel are available door panel map pockets, a deep glove box and an available mini-business console, all of which provide plenty of storage for everything from CDs and cellular phones to magazines and maps. And since your eyes will be on the road a lot more than they will be on the interior, we're just as proud of Dakota's outstanding everything-within-reach ergonomics and excellent all-around visibility.

Fill 'er up.

The magazine writers call it superiority in room. We just call it comfort. It means having more overall interior room than any other vehicle in its class.

Five-position adjustable seat belts with traveling buckles increase comfort for driver and outboard front passenger alike, no matter what their height.

With the roomiest overall interior of any compact pickup, you can pack Dakota without feeling like you've been packed in yourself. Height accommodation has guided design of the front seats, allowing a full 7.4 inches of fore and aft space. Front-seat passengers get excellent leg room, while rear-seat passengers have easier entrance and exit.

Room for six people, and places for all the things they'll need. Places like a deep glove box, available door pockets, handy center console, and Club Cab® rear bench with underseat storage (see below).

Properly secure all cargo before transporting.

Somehow the word "pi

You may not be used to this much confidence and security in a pickup, including details like a key fob with panic button and remote keyless entry system.

Next Generation driver and passenger side air bags* are equipped with a passenger side on/off switch mounted on the lower central part of the instrument panel.

*Certified to the Federal Regulations that allow less forceful air bags. Always use seat belts. Remember a backseat is the safest place for children in Dakota Club Cab®. Rearward-facing child seats can be used in the front seat only with the passenger air bag turned off.

Dakota's built-in crumple zones, knee blockers on the lower instrument panel, steering column, front seat-backs and roof are all engineered to absorb energy.

cup” just doesn’t cut it.

High-strength steel door beams offer extra protection from side-impact intrusion collisions.

Optional four-wheel antilock brakes offer the kind of control (near right) that non-ABS systems just can't match, when weather and road conditions are less than ideal (far right).

Standard features and options.

Dakota models include:

- Next Generation driver and front-passenger with passenger air on/off switch
- B-pillar-mounted
- 117-ampere
- 500-ampere, maintenance-free
- Power-assisted front disc/rear drum with rear antilock
- Antichip coating on lower bodyside, galvanized steel
- Front side windows
- Stainless steel
- Tinted, all windows
- Analog, speedometer, tachometer, displays for VF
- gauges for fuel level, engine coolant
- warning lamps for brake system, ABS, check gauges, check
- high-beam headlamps on, seat belts, low washer fluid, turn signal
- upshift indicator, overdrive off, automatic transmission
- speed control on and security alarm system
- Dgar, located on lower center of instrument panel
- Interior, dome lamp with door actuation
- Manual 5'x7" black fixed

- Pickup Box** — Double-wall construction with one-piece, high-strength steel floor, cargo tie-down loops and two-tier loading capabilities
- Seat Belts** — Three-point Unibelt for outboard seating positions; front outboard positions include height-adjustable shoulder belts with traveling inboard buckles; lap belts in front and rear (Club Cab® models only) center positions
- Sound System** — AM/FM stereo radio with cassette player and four speakers
- Steering** — Power-assisted, rack-and-pinion (4x2 models); power-assisted, recirculating ball (4x4 models)
- Suspension**
 - 4x2**
 - Front, upper and lower "A" arms, coil springs, heavy-duty gas-charged shock absorbers and stabilizer bar; rear, live axle, four-leaf longitudinal springs and heavy-duty gas-charged shock absorbers
 - 4x4**
 - Front, upper and lower "A" arms, torsion bars, heavy-duty gas-charged shock absorbers and stabilizer bar; rear, live axle, four-leaf two-stage longitudinal springs and heavy-duty gas-charged shock absorbers
- Tailgate** — Removable with caliper latches
- Wiper System** — Windshield, two-speed with intermittent wipe mode

* Certified to the Federal Regulations that allow less forceful air bags. Always use seat belts. Remember a backseat is the safest place for children in Dakota Club Cabs. Rearward-facing child seats can be used in the front seat only with the passenger air bag turned off.

The New Dodge

We're all about change.

There is no status quo at Dodge. We've transformed the way people drive with new kinds of vehicles that are an embodiment of the latest technologies. Alternate fuels, exotic materials, and new configurations are constantly being explored. Advances in safety technology, suspension systems, engine dynamics, and ergonomics are continually evaluated. Because we know that no matter how fast things change these days, people still want cars and trucks that are good looking, well-built, and exciting to drive. And to ensure that you get all the information you need to make an intelligent purchase, there are automotive experts awaiting your call at 1-800-4-A-DODGE. We've also created a Web site you can visit at anytime from anywhere in the world at: www.4adodge.com.
