

We're  
making  
everything  
fun

**What's fun.** *The hallmarks of a life lived with exuberance are often deceptively simple. They're things like making a snowman.*

*Going for a long walk. Dining at the backyard picnic table. And having a Dodge Neon in the garage.*

*Neon owners expect driving to be another fun aspect of life.*

*They seek a car that's roomy and comfortable. An outgoing car with an unquenchable appetite for going. With an irresistible automotive face that suggests fun is about to begin.*

*Neon entered the automotive world as an agent for change. Note the exterior styling and interior volume, which are the result of cab-forward design. Note the power of the 2.0-liter engine, which makes a nice note of its own.*

*Neon is also secure. There's a full complement of safety features, from standard side-guard door beams to available four-wheel disc antilock brakes.*

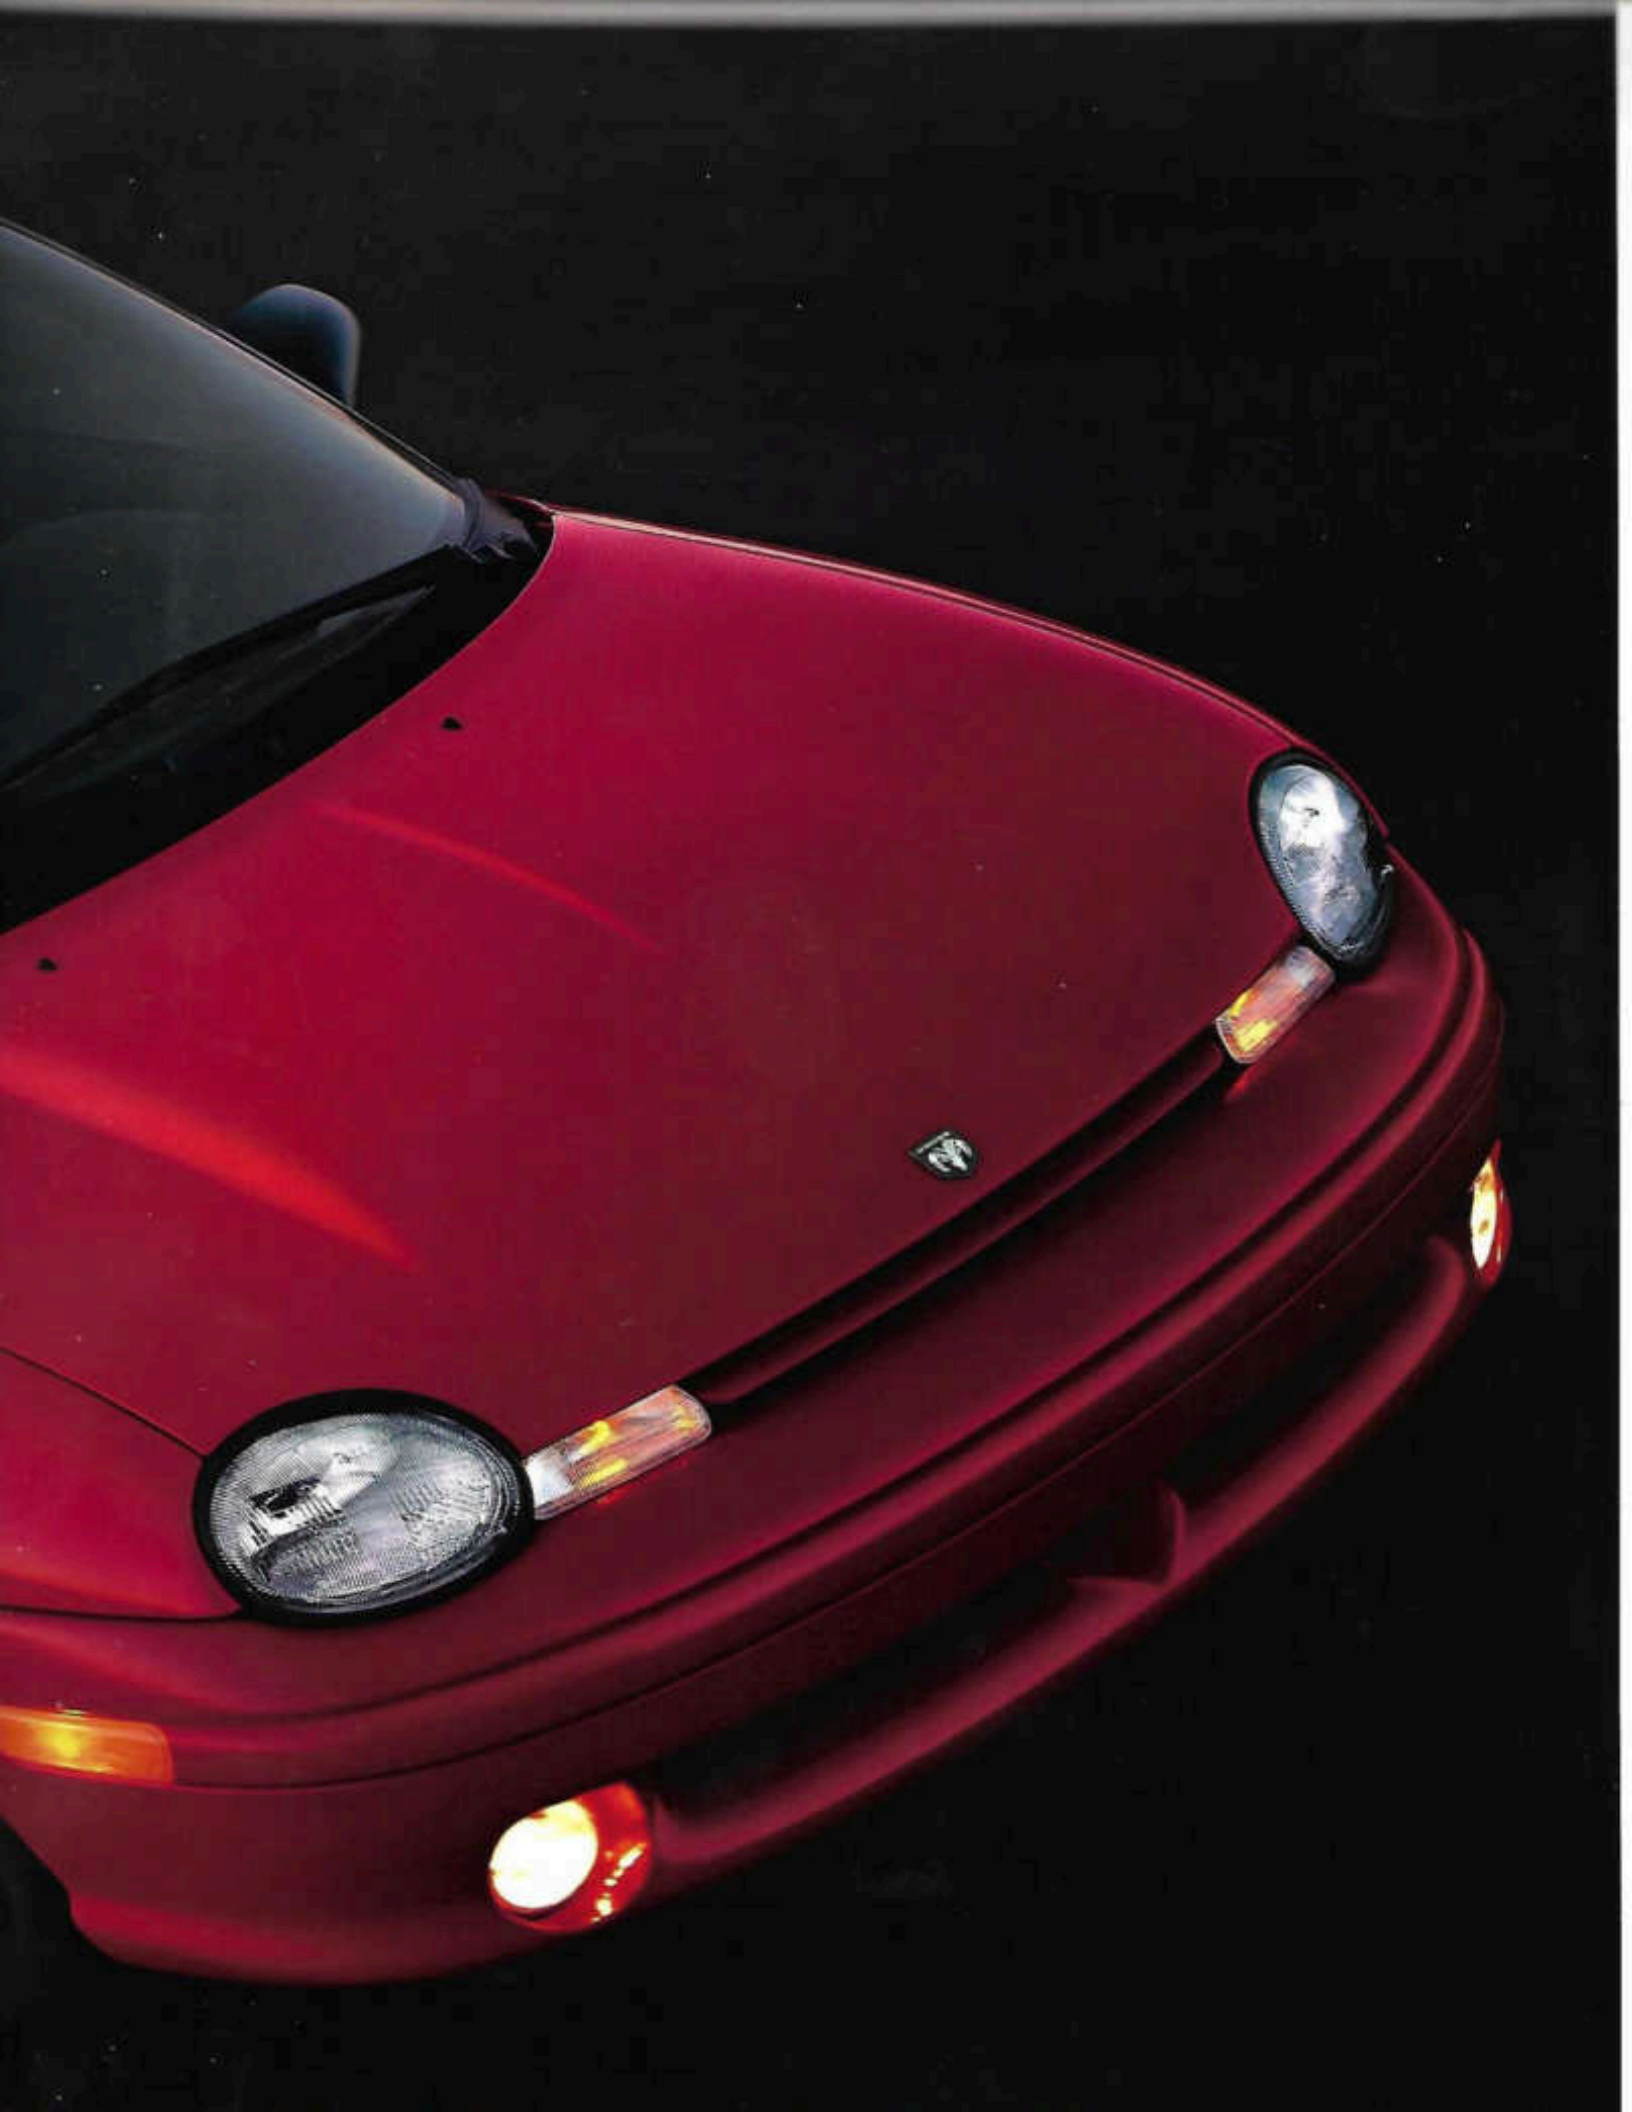

*And after all these hallmarks, here comes a Neon footnote. With this nicely equipped fun machine, the sticker shock*

*doesn't amount to even a tiny buzz. In fact, in every aspect of the word, we're content to leave the "buzzing" to our competitors.*

Neon  The New Dodge

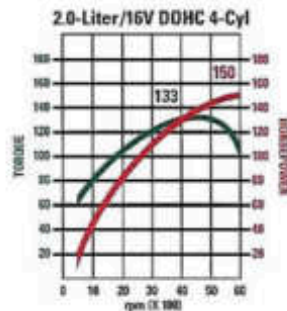

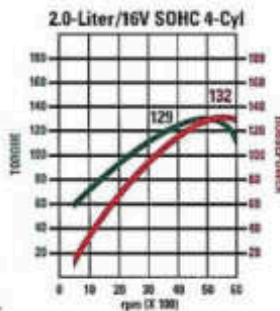

# Zip Drive

**Punch.** The 2.0-liter SOHC 16-valve engine that creates 132 horsepower represented a breakthrough in its class. Getting such a vigorous power plant was like getting an aerobicized heart. No more was a small car required to be sluggish. And even today, no standard engine among Neon's primary competitors matches this impressive output.

**Counterpunch.** This 2.0-liter DOHC 16-valve engine produces 150\* horsepower and intensifies Neon's maneuverability. Zero to 60 mph is achieved with surprising promptness. The power bulge hood accurately suggests the surplus of twin-cam potential underneath.

\*Achieved using premium unleaded fuel. However, premium fuel is not required.

*A quick study. The Dodge/Skip Barber Driving School and the Skip Barber Racing School chose Dodge as the exclusive supplier of vehicles and engines for all their teaching and racing operations. That means examples of the sharply responsive Neon R/T are prominent among the 100 passenger vehicles in the school's training fleet. For information, call 1-800-221-1131, e-mail [speed@skipbarber.com](mailto:speed@skipbarber.com) or visit [www.skipbarber.com](http://www.skipbarber.com).*

*Simple abundance. Like thoroughbred sports-racing cars from Europe, Neon ACR makes do without some luxuries. Cranking up the windows yourself means having a car that's lighter in weight, and therefore faster in races sanctioned by the Sports Car Club of America.® Included as standard equipment on Neon ACR are a performance five-speed manual transmission, tuned-for-competition suspension with adjustable struts and performance tires mounted on 14-inch cast aluminum wheels.*

The volume is  
gear splitting.

*Invitingly purposeful. Something explicit is going on here. It's Neon's unreserved way of welcoming you to the helm. A cleanly attractive dash, well-integrated stack of climate and audio controls, and forthright switch gear for lamps and wipers manage to be inviting without sacrificing any of their purposefulness.*

*And this principle holds true as you add options such as fog lamps or cruise control — the buttons that work them are neatly incorporated into the instrument layout or the steering wheel.*

**Audio power.** Neon's available sound system with in-dash CD player is a communications advance.

**MPH meets RPM.** Earnest driving—with heel-and-toe downshifts—requires an 8,000-rpm tachometer.

*Autocrossing and SCCA® racing and the Dodge/Skip Barber Driving School require an 8,000-rpm tachometer. That's why we include one in every Neon Sport, R/T, and ACR.*

*SCCA is a registered trademark of Sports Car Club of America, Inc.*

**Load audacity.** Because of a low lift-over height and a trunk lid that pivots up and away, the job of loading Neon's trunk with gear is hardly a grind. A remote trunk lid release is standard with all models except Neon ACR.

**A museum display?** Neon's interior design is a testimonial to tasteful modernity. But that's not to overlook the practical aspects. The 60/40 split-folding seatback lets unwieldy snowboards and skis extend into the passenger compartment, while one unruffled companion rides in the undisturbed rear seat

**Seat of tranquility.** With Neon, safety is active and passive. Front and rear crumple zones absorb crash forces, leaving the passenger cell intact. Internal door beams of high-strength steel protect against impacts from the sides. Neon coupes are equipped with automatically self-adjusting seat belts to provide a snug, secure fit.

**A braking story.** Four-wheel disc brakes are included on Neon R/T and Neon ACR. Four-wheel disc antilock brakes are available on Neon, Neon Sport and Neon R/T.

**Admittance free to bearer!** Remote keyless entry, optional on Neon Sport and R/T, is a blessing every time you come out to the car with bags of groceries in hand. Or for that matter, every time you come out to the car.

**Kid-proof.** When actuated, child-protection rear door locks, standard in Neon sedan, guard against the inadvertent opening of a rear door.

**Supplemental restraint.** The incomparable protection of Next Generation driver and front-passenger air bags\* is, of course, standard.
