Honda
SENSING

Built for what-if.

Even the most attentive of drivers can miss things. That's why the Odyssey offers Honda Sensing®, an available suite of safety and driver-assistive technologies designed to assist and help protect you and your passengers.

Collision Mitigation Braking System™ (CMBS™)⁹ (lower right image)
This innovative offering can help bring your Odyssey to a stop by automatically applying brake pressure when the system determines a frontal collision is unavoidable.

Lane Keeping Assist System (LKAS)¹⁰ (lower left image)
With your hands on the steering wheel, long highway drives are easier with LKAS, which subtly adjusts steering to help keep the vehicle centered in a detected lane.

Road Departure Mitigation System (RDM)¹¹
This system can determine if you cross over detected lanes without signaling, can provide steering assistance to help you return to your lane or provide braking to help keep from leaving the roadway entirely.

Adaptive Cruise Control (ACC)¹² (upper image)
ACC helps you maintain a set following interval behind detected vehicles for highway driving.

Game changer.

The Odyssey is all about letting you do more. Whether you're transporting MVPs or 4' x 8' plywood sheets, fit everything you need into an expansive interior that's easy to clean.

Extras That Make a Difference

- Seating for eight*
