

2023

IONIQ 5

The right car. At the right time.

Electric vehicles are no longer just fuel for thought. Not when the EV is the Hyundai IONIQ 5. Then, it's fuel for action – inspired by a fresh, highly functional design that turns heads all over the world. The 2022 IONIQ 5 was named 2022 World Car of the Year by a panel of over 100 international journalists. Here in the U.S., Autotrader named IONIQ 5 the Best New Car of 2022.¹ Now, it's your turn to make IONIQ 5 the car of *your* year.

The first Hyundai engineered to be exclusively all-electric, the IONIQ 5 combines what no EV has before: Ultra-modern design. Ultra-fast charging. Innovative cabin space. And exceptional performance.

With its pixel-inspired light clusters, clamshell hood and automatically extending door handles, one look lets you know IONIQ 5 is like nothing else on the road. Undeniably modern, its design signals a new electric era is beginning – and with it, an entirely new series of all-electric vehicles from Hyundai.

IONIQ 5 uses technologies that optimize your precious time. It's one of the few electric vehicles that can take advantage of a 350 kW DC Fast Charger, which can bring your battery from a 10 to 80 percent charge in just 18 minutes.² A full charge can deliver over 300 miles of range³ – making trips to your favorite campsites a little less remote. Want to bring some creature comforts from home along for the ride? An available Vehicle-to-Load (V2L) two-way onboard charger and accessory external adapter let you power up your TV, e-bike, laptop and latte machine simply by plugging into your car.⁴

Thanks to its purpose-built electric platform, IONIQ 5 also optimizes the amount of room inside the cabin. Not having a gas powertrain allows for a longer wheelbase with a flatter floor, opening up the interior to generous amounts of space. Step inside, and you'll see how the futuristic dashboard and center stack – along with an available sliding center console and wireless charging pad – give you more freedom. And isn't that what energy independence is all about?

¹For more information, visit Autotrader.com. Autotrader is a registered trademark and used with permission. ²Charging time for trim levels equipped with a 77.4 kWh battery. Charging rate and time estimate varies based on factors including battery charge level, output of the charging unit, vehicle and battery settings, and outside temperature. ³IONIQ 5 RWD 303-mile range based on a fully charged battery and 114 combined MPGe. MPGe is the EPA-equivalent measure of gasoline fuel efficiency for electric mode operation. All figures are EPA estimates and for comparison purposes only. Actual range and mileage will vary with options, driving conditions and habits, vehicle and battery's condition and other factors. ⁴Optional two-way charging will deplete battery and becomes inoperable once battery discharge limit reaches 20%. Not all electrical appliances will operate properly when using this feature. Do not use products that require a continuous power supply. Total power draw should not exceed 1.9 kW.

Goodbye pump.
Hello plug. Problem solved.

IONIQ 5 gets your commuting costs under control with a 225-hp Rear Wheel Drive powertrain that includes a combined 114 MPGe rating.¹ Want more power underfoot? Opt for All Wheel Drive, and the 446 lb-ft of torque you feel surging from a 320-hp dual-motor system launches you off the line or into a passing lane. You can also choose from four driving modes (Eco, Normal, Sport or Snow) to suit your mood or road conditions.

The speed of its charging is just as impressive: Plug into a 350 kW DC Fast Charger for 5 minutes, and you'll add up to 68 miles to your driving range.² Enter a recognized DC fast charging station into the navigation system as your destination, and a battery

preconditioning feature can automatically initiate to warm the battery for quicker recharging in all weather conditions.

An available Premium Head-up Display with Augmented Reality lets you track driving vitals and navigation at a glance. Have some recreational toys you want to bring along for the ride? No problem, thanks to IONIQ 5's 2,300-pound towing capacity.³ And here's something else to help you go the distance: The lithium ion battery system comes with a warranty of 10 years or 100,000 miles, whichever occurs first.⁴

¹Ratings for RWD trim levels equipped with a 77.4 kWh battery. MPGe is the EPA-equivalent measure of gasoline fuel efficiency for electric mode operation. Use for comparison only. Mileage may vary with driving conditions, driving habits, the vehicle's condition, the age/condition of the lithium ion battery and other factors. ²Approximately 5 minutes on a 350 kW Fast Charger for trim levels equipped with a 77.4 kWh battery can provide an estimated driving range of up to 68 miles. Charging rate and time estimate varies based on a number of factors including current battery charge level, output of the charging unit, vehicle and battery settings and outside temperature. ³Towing capacity with trailer brakes. Towing not recommended for Standard Range RWD. ⁴Limited Battery Warranty covers defects in the factory workmanship or materials of the lithium ion battery for 10 years from the date of original retail delivery, date of first use or 100,000 miles, whichever occurs first. Coverage does not apply to lease/commercial vehicles or vehicles serviced or registered outside the U.S. See your Owner's Handbook for details and limitations. ⁵Rear Cross-Traffic Collision-Avoidance Assist (RCCA) is designed to notify drivers of approaching cross-traffic behind the vehicle. When another vehicle is detected while you are backing out of a parking spot, it provides audible and visual display warnings and applies braking if it senses a collision is imminent. RCCA is active when your car is in reverse gear at a speed less than 6 mph. It only engages during the first activation of reverse gear from park and may not detect all vehicles. Never rely exclusively on RCCA. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. See Owner's Manual for details and limitations. ⁶Remote Smart Parking Assist (RSPA) can help remotely park your vehicle. RSPA may not function correctly if a parking sensor is damaged, dirty or covered, or if weather conditions (heavy rain, snow or fog) interfere with sensor operation. Always inspect the parking area with your own eyes. See Owner's Manual for details and limitations. ⁷The Surround View Camera System (SVCS) is a parking support system. The Surround View Monitor cannot completely eliminate blind spots, may not detect every object and does not warn of moving objects. Always check your surroundings before moving your vehicle. See Owner's Manual for details and limitations. ⁸Blind-Spot Collision-Avoidance Assist (BCA) warns the driver of other cars in the blind-spot region. If BCA detects an unsafe lane change being attempted, it applies braking on the opposite side of the attempted lane change to help avoid a collision. There are limitations to the function, range, detection and clarity of the system. It will not detect all vehicles or objects in the blind spot and may not operate if sensors are obscured. Do not rely exclusively on BCA. BCA is a supplemental system. It is the driver's responsibility to exercise caution when changing lanes. See Owner's Manual for details and limitations. ⁹The Blind-Spot View Monitor (BVM) assists in changing lanes by providing a live view of the blind spots on either side of the vehicle and sounding an audible alert if another vehicle is detected. The turn signal must be activated, and other system limitations apply. Do not rely exclusively on BVM. It is the driver's responsibility to be aware of the surroundings and ensure it is clear before changing lanes or directions. See Owner's Manual for details and limitations. ¹⁰Highway Driving Assist (HDA) is for highway use only and helps keep you centered in your lane while maintaining a safe distance from the vehicle ahead. Lane markings must be clearly visible on the road. HDA should not be used in poor weather, heavy or varying traffic, or on winding or slippery roads. HDA will not work under all circumstances and will not prevent loss of control. Driver remains responsible to slow or stop the car to avoid a collision. See Owner's Manual for details and limitations. ¹¹Assisted lane change function occurs when the driver operates the turn signal while holding the steering wheel and driving over 37 mph. ¹²To qualify for 2022 TOP SAFETY PICK+, a vehicle must earn good ratings in the driver-side small overlap front, passenger-side small overlap front, moderate overlap front, side, roof strength and head restraint tests. It also must earn an advanced or superior rating for vehicle-to-vehicle and vehicle-to-pedestrian front crash prevention and come with standard acceptable- or good-rated headlights. For details visit www.iihs.org.

Drive smarter. Drive safer.

Your IONIQ 5 looks out for your safety in countless ways. Then again, some of the ways can be counted. Like the six airbags located throughout the cabin. And the suite of advanced SmartSense safety features that use cameras, radar sensors and ultrasonic sensors to monitor your surroundings from nearly every angle.

Around town, standard Rear Cross-Traffic Collision-Avoidance Assist⁵ and available features like Remote Smart Parking Assist⁶ and a Surround View Monitor⁷ help navigate your parking maneuvers. On the highway, Blind-Spot Collision-Avoidance Assist⁸ is enhanced by an available Blind-Spot View Monitor that displays live video in the instrument cluster from either side of the car.⁹

The innovation doesn't stop there. IONIQ 5's Highway Driving Assist (HDA) helps your cruise control maintain a safe distance from the vehicles detected in front of you, automatically adjusts for changing speed limits and reduces your speed as you approach curves in the road.¹⁰ Available HDA II enhancements respond to vehicles that cut into your lane at low speeds and vehicles that drive too close in the adjacent lane. It can even assist in making lane changes.¹¹

IONIQ 5 Limited in Light Gray H-Tex™ with Gray Trim

So much room. So little clutter.

IONIQ 5's flat floor creates so much interior space, it almost feels like you're sitting in your living room. In fact, IONIQ 5 has more room for you and your passengers to spread out than any vehicle in its class.¹ Along with more passenger space, there's more cargo room. And enough space on the dash for two 12.3" high-definition display screens – one for the instrument cluster, the other for navigation and infotainment.

But what's roominess without comfort? Check out the supple feel of IONIQ 5 SEL and Limited's H-Tex™ leatherette-trimmed seating. Hyundai designers also found innovative ways to help you relax. The driver seat is available with a reclining Relaxation Function that supports your legs while you rest. The front seatback design is slimmer to allow more space for 2nd-row passengers. Those 2nd-row seats feature reclining seatbacks and also slide – or fold down to dramatically increase cargo space. Dual USB charging ports and an available Vehicle-to-Load (V2L) two-way charger beneath the 2nd-row seats ensure power is available throughout the cabin for your digital devices and larger electronic items.²

Between the front seats, IONIQ 5's center console is like a floating island. To create more freedom of access, there's an available sliding feature that moves it back and forth. The center armrest's big surface area opens to reveal a storage tray and raises for improved access to a larger storage compartment – perfect for handbags. Dual cupholders and an available wireless charging pad³ offer added convenience, while an available glass Vision Roof expands your sense of spaciousness.

¹Claim based on comparison of specifications on manufacturer websites. ²Optional two-way charging will deplete battery and becomes inoperable once battery discharge limit reaches 20%. Not all electrical appliances will operate properly when using this feature. Do not use products that require a continuous power supply. Total power draw should not exceed 1.9 kW. ³Qi wireless charging function is based on smartphone compatibility and/or specific accessory cases.

IONIQ 5 Limited AWD in Cyber Gray

Turns out the key to happiness isn't actually a key. It's an app.

What Hyundai offers its owners goes beyond our award-winning vehicles. It also includes Bluelink,[®] a range of innovative technologies that enable remarkable connectivity between you and your IONIQ 5.¹

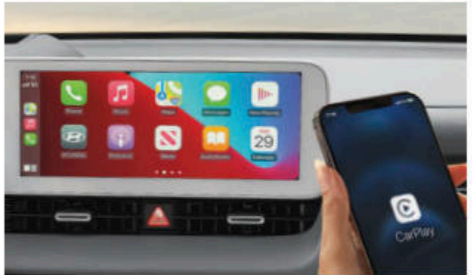

With the MyHyundai app, you can remotely start your IONIQ 5 and adjust climate controls from your office or kitchen using your smartphone, Amazon Echo[®] or Google Home[™] virtual assistant.² Even if you are miles away from your vehicle, you can check to see if you've left your doors unlocked or your liftgate open just by consulting your smartphone.³

Download the available Hyundai Digital Key app to your compatible Android[™] smartphone, and you can use it to unlock the front doors and turn on your vehicle. You can also assign digital keys to multiple drivers, who can instantly retrieve their personalized radio presets, instrument cluster display preferences and driver seat settings.⁴

Every IONIQ 5 comes standard with Apple CarPlay[®] and Android Auto,[™] and you can now connect two phones to the audio system simultaneously via Bluetooth[®] streaming.⁵ Good to know you can easily keep your digital devices powered up, too. A wireless charging pad is available, and five USB-A ports (3 up front and two in the 2nd row) are standard.

Hyundai Digital Key

Apple CarPlay

Wireless device charging

Bluelink

Automatic Emergency Assistance

Bluelink Connected Care offers 24/7 SOS Emergency Assistance as well as Automatic Collision Notification that calls for help if you're in an accident where your vehicle's airbags deploy.⁶

Remote Charge Access

You can control your IONIQ 5's charging remotely while it is plugged into an external power source, and schedule charging at specific times to take advantage of low-demand hours and rates.⁷

Remote Vehicle Status

Wondering how much charge your battery has? If the doors are locked or your liftgate is closed? Your MyHyundai app knows the answers to these questions and more.

Destination Send-to-Car

Use your smartphone to find restaurants or points of interest, then send them to IONIQ 5's navigation system for access to driving directions the moment you slip behind the wheel.⁸

Remote Vehicle Controls

Use your smartphone, home assistant or wearable device to remotely start your IONIQ 5, unlock your doors, set your vehicle's cabin temperature and more.

Remote Climate Controls

Pre-heating your IONIQ 5 when connected to a power source saves battery power that would be needed to heat the vehicle on the road. On warmer days, the Remote Climate Control can cool the cabin before your drive.

¹The 2023 IONIQ 5 includes three years of the Bluelink Connected Care, Remote and Guidance (factory-equipped navigation required) packages. All trials require an active Bluelink subscription agreement subject to the Connected Services Terms and Conditions. Three-year term starts from the new vehicle date-of-first-use, is available for new vehicle purchases and leases, and is transferable to subsequent owners subject to the Terms and Conditions. Only use Bluelink and corresponding devices when safe to do so. Cellular and GPS coverage is required. Features, specifications and fees are subject to change. For more on details and limitations, visit HyundaiUSA.com or your authorized Hyundai dealer. ²Requires active Bluelink subscription with Remote package. Amazon, Alexa and all related logos and motion marks are trademarks of Amazon.com, Inc. or its affiliates. Google Assistant and Google Home are trademarks of Google Inc. ³Requires active Bluelink subscription with Remote package. ⁴The Hyundai Near Field Communication Digital Key requires a compatible Android smartphone and appropriately equipped 2023 IONIQ 5. Not all Android devices are compatible. Vehicle must be equipped with a smart key with push button start, wireless device charging and Audio Video Navigation System 5.0 (or newer) or Display Audio 2.0. Lock/unlock functionality works on the front doors only. See your Owner's Manual or visit your local Hyundai dealer for details. ⁵Apple CarPlay is a registered trademark of Apple Inc. Android Auto[™] is compatible with Android[™] phones running Android 5.0 or higher. Android Auto may not be available on all devices and is not available in all countries or regions. Additional apps may be required. Android and Android Auto are trademarks of Google LLC. ⁶Bluelink agents will contact existing emergency service providers. ⁷Requires Bluelink Remote package. For remote charging, vehicle needs to be plugged into an electrical socket. See Owner's Manual for details and limitations. ⁸Requires active Bluelink subscription with Guidance package and vehicle equipped with navigation system.
