Senses, alerts, and helps **STOP**

Even the best drivers can use a little help. So we created Kia Drive Wise,* our available, advanced driver-assistance marvels that are designed to keep you alert and aware of sudden changes in the flow of traffic ahead of you — and even help you brake if needed.

FORWARD COLLISION WARNING SYSTEM DW**

Forward Collision Warning System detects slowing or stopped traffic ahead, and can alert you if you get too close.

AUTONOMOUS EMERGENCY BRAKING DW**

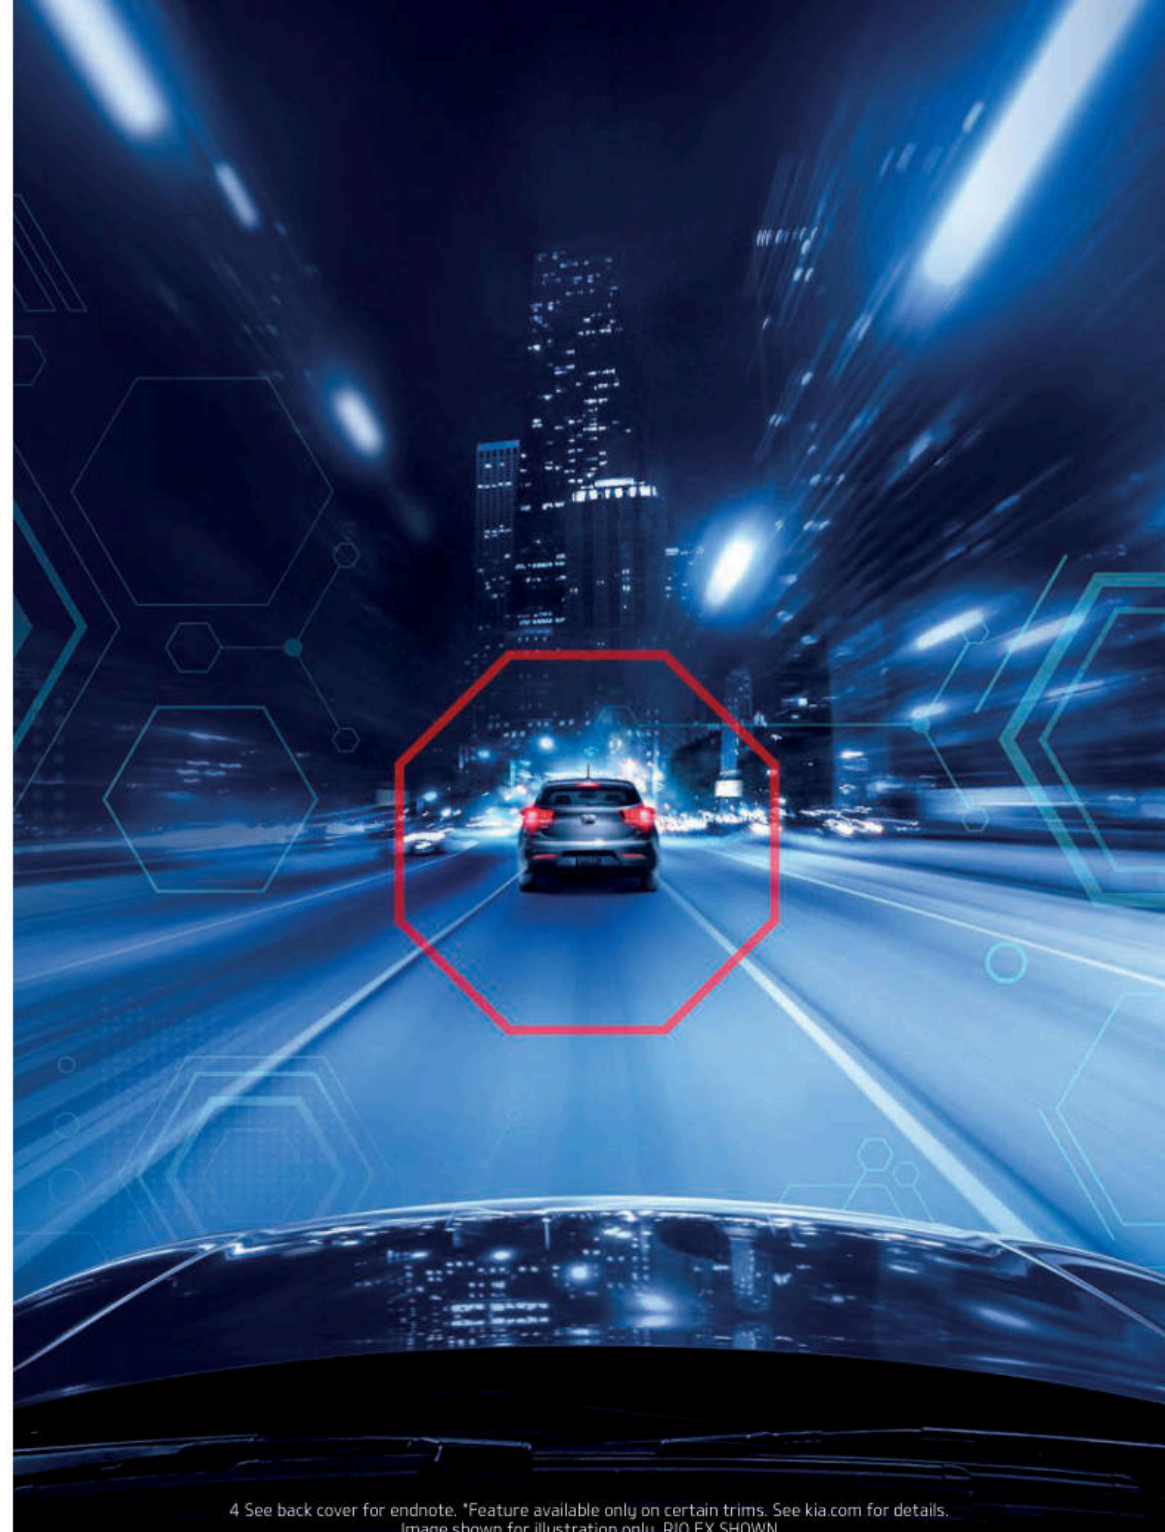

This system is designed to detect and monitor vehicles ahead of you and automatically apply the brakes if it determines a crash is imminent.

BRAKE ASSIST SYSTEM

If you suddenly slam on the brakes, it's designed to sense the urgency and apply full brake power, which can help shorten your braking distance.

ELECTRONIC BRAKE-FORCE DISTRIBUTION

Based on the vehicle's weight distribution, it helps adjust the balance of brake power accordingly.

It looks great from the back
**BUT IT SEES
EVEN BETTER**

Rio's available Rear-Camera Display^{4*} is a feature you'll use daily because it helps you see things behind you that you might miss by simply using your mirrors or looking over your shoulder.

THE REAR-CAMERA DISPLAY TURNS ON AUTOMATICALLY

Just put Rio in reverse and the rear view is designed to automatically pop up on the bright, high-contrast floating media monitor.

GRID LINES WILL HELP GUIDE YOU

Yellow (getting close) and red (stop!) grid lines appear on the screen to help you gauge how much space you have before you bump into something.

Because
**DRIVING
AND SMILING**
should happen simultaneously

Rio is flat-out fun to drive, with a responsive 1.6L GDI engine, a new rear suspension for great handling, and high-strength steel body construction for quiet, smooth, smile-inducing outings — whether you're maneuvering around town at low speeds or hitting the open road.

JUST THE FACTS:

1.6L Gasoline Direct Injection 4-cylinder engine
130 hp @ 6,300 rpm
6-speed manual transmission or
available 6-speed Sportmatic® transmission*

When life throws you a **CURVE** here's how to stay on track

TO ENHANCE CONTROL

ELECTRONIC STABILITY CONTROL (ESC)

In difficult driving situations, ESC is designed to control the engine and brakes for improved directional stability.

TO KEEP YOU ON COURSE

VEHICLE STABILITY MANAGEMENT (VSM)

VSM can intervene to enhance stability and steering responses when driving on slippery roads.

TO HELP PREVENT SLIPPING

TRACTION CONTROL SYSTEM (TCS)

When TCS senses wheelspin during acceleration, it uses a combination of engine power and brake force to help transfer power to the wheel that has more traction.

WHEN YOU HIT THE BRAKES

ANTI-LOCK BRAKING SYSTEM (ABS)

The cornerstone of active safety features, ABS helps provide greater control when stopping in difficult conditions like wet or slippery roads.

IT DETECTS, COORDINATES, AND REACTS

to give you more peace of mind

Advanced sensor systems, strategically placed airbags, and breakthroughs in material design that have led to stronger body construction are just a few of the ways Kia never stops working to help increase your protection.

ADVANCED AIRBAG SYSTEM¹³

includes dual front, front seat-mounted side, and full-length side curtain airbags to help protect driver and passengers

AIRBAG & SEAT-BELT SENSORS¹³

monitor the severity of certain impacts and seat-belt use, then help to control airbag inflation accordingly

FRONT SEAT-BELT PRETENSIONERS

tighten extra slack in driver and front-passenger seat belts in certain collisions to help reduce injuries

HEIGHT-ADJUSTABLE SEAT-BELT ANCHORS

let you adjust the front seat belts for a proper fit to help optimize effectiveness

REINFORCED BODY CAGE

helps absorb impact energy in certain collisions to protect the passenger compartment

No system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive responsibly. ¹³ See back cover for endnote. Simulated image. Inflated airbags shown for illustration purposes only. RIO EX SHOWN
