

1999 PONTIAC
GRAND AM
EXCITEMENT
WELL BUILT

Solid St

There's a saying among designers:
"If it looks right, it probably is." From
any angle the all-new Grand Am's bold,
aggressive stance looks right. But what
makes it so? Could be the way the
standard fog lamps are integrated up
front to throw out their wide angle
beams. Could be the way
the wheels seem to push
outward from the corners of the car
to enhance road perfor-
mance. Or it could be the
way the rear spoiler chan-
nels air over the rear deck.
It could be all of the above.

Solid Fe

Take the wheel and get a grip on the road. In the all-new Grand Am, it'll feel like a direct connection. The cockpit's gauges are larger and its ergonomic controls placed closer to the driver than those of any car in its class. This helps keep the driver linked to the experience, as do Grand Am's standard performance features like anti-lock brakes (ABS), automatic transmission with Enhanced Traction System and its all-new four-wheel independent suspension. Air conditioning, illuminated entry, automatic programmable power door locks, controlled-cycle windshield wipers and a Tilt-Wheel adjustable steering column combine to make Grand Am's standard content level the most generous in its class.
